EDUCATION

Royal Melbourne Institute of technology — Melbourne, VIC
Master of Data Science — *Aug. 2024 – Jul 2026*

Gogte Institute of Technology — Belgaum, India
Bachelor of Engineering in Computer Science and Engineering — *Jan. 2018 – Jun 2022*

EXPERIENCE

Data Science Intern — Jan 2026 – Jun 2026
Dolanto — *Melbourne, Australia*

- Supported the development of an LLM-driven contract analysis solution to detect contradictions across multiple client documents.
- Assisted in designing retrieval and ranking workflows that combined keyword and semantic search with LLM-based reranking to improve result relevance.
- Contributed to building data ingestion and preprocessing pipelines that structured unorganized contract text into clean, analysis-ready formats.
- Collaborated with client stakeholders to gather feedback and translate evolving requirements into regular, incremental deliverables.
- Maintained version control, documentation, and modular code practices to support reproducibility and team collaboration.

Data Analyst — Apr 2022 – Jun 2024
Dentsu Global Services — *Bengaluru, India*

- Delivered accurate and automated reporting using Tableau dashboards, enabling leadership to monitor business performance in real time.
- Conducted in-depth statistical analysis to identify trends, performance gaps, and growth opportunities, translating findings into actionable recommendations for clients.
- Developed and optimized SQL queries to extract, transform, and analyze large datasets, improving reporting efficiency and accuracy.
- Implemented data validation and quality assurance processes to ensure integrity, consistency, and reliability of analytics outputs.
- Partnered with cross-functional teams to gather business requirements and deliver customized analytical solutions aligned with strategic objectives.
- Achievement:
  Awarded the Make It Real Award in recognition of exceptional client impact and high-quality analytical delivery.

PROJECTS & PROGRAMS

Live Performance Monitoring Dashboard | Tableau, SQL, Excel

- Designed and deployed a daily live Tableau dashboard to monitor client product performance across multiple regions, enabling real-time visibility into key business metrics.
- Integrated and transformed data using SQL to ensure accurate, consistent, and up-to-date reporting across diverse data sources.
- Developed and tracked multiple KPIs, sales performance, regional trends, and product-level metrics, supporting data-driven strategic decisions.
- Implemented historical data comparison features to analyze performance trends over time and identify growth opportunities and underperforming segments.
- Enabled export functionality for stakeholders to download customized reports in Excel and PDF formats, improving accessibility and efficiency.

LLM-driven contradiction detector | LLM, RAG

- Implemented a hybrid retrieval system (BM25 + Chroma + all-MiniLM-L6-v2) to search across contract clauses across multiple documents, combining keyword and semantic search for better relevance
- Added LLM-based reranking (Ollama running LLaMA 3 / Qwen2.5 and GPT 5.5 with an API integration) to sharpen top-k accuracy
- Designed a clause-level ingestion pipeline that preserved context and got rid of fragmented, hard-to-use outputs
- Delivered the project end-to-end, turning client feedback into weekly deliverables and shifting priorities
- Managed the GitHub workflow (version control, docs, modular structure) to keep the codebase clean and reproducible

TECHNICAL SKILLS

Languages: Python, SQL **BI & Visualization**: Power BI,Tableau, Excel **Whiteboarding & Design Tools**: Miro
Libraries: pandas, NumPy, scikit-learn, matplotlib
Leadership & Soft Skills: Mentoring, Cross- Collaboration, Process Documentation **Technologies & Tools**: Snowflake, AWS, Ollama
